## Better processes - Better communities

### *A Microsoft-based Business Software Solution for Local Government*

*Jan 2011*

#### **The Company – Information Outlook**

Information Outlook is committed to delivering to Local Government an innovative Microsoft Dynamics based corporate business solution that covers a range of integrated financial and Local Government applications on the Microsoft.NET platform.

Our recommendation will provide councils with the most up-to-date applications and Microsoft technology, enabling organisations to pursue a future integrated information, communications and technology (ICT) strategy that will continually grow with the business. Our solution is based on the global enterprise Microsoft Dynamics NAV financials and our locally developed CouncilManager™ Local Government add-on functionality, providing users with a complete, end-to-end integrated business model.

Microsoft Dynamics NAV is a modern, global business management enterprise resource planning (ERP) finance system used around the world in a variety of private companies and levels of government organizations. There is a healthy Dynamics community in Australia and Information Outlook is developing and supporting this product for the Local Government sector.

Our significant investment in developing this business system specifically for Local Government use has enabled us to bring competitiveness and innovative products to this sector, on a Microsoft-aligned business model.

The company is established within Local Government in NSW, WA and Tasmania.

#### **Capability and Experience**

Information Outlook is a mature and experienced software and systems development, deployment and support organization.

A Microsoft Certified Partner, Information Outlook have installed solutions to mid range and tier one corporate businesses throughout Australia ranging from 5 users to 250 users.

In 2005, the company was awarded federal funding to create and deliver innovation to the Local Government sector by writing a new land information system comprising property, rates, water billing, animal control and regulatory applications for Local Government.

Following several years of development, the new system was successfully implemented into sites in Tasmania from 1<sup>st</sup> July 2009, one site being major water corporation, Southern Water. Our software is currently used to manage land information and regulatory applications for 125,000 properties in the Southern Region of Tasmania. Ongoing developments are made constantly to meet the business requirements of Water Authorities and Local Government

## Microsoft Dynamics NAV 2009

### Highlights of New 2009 Version

Experience a comprehensive business management solution that helps people work faster and smarter, and gives your business the flexibility to adapt to new opportunities and growth. Microsoft Dynamics NAV 2009 offers a breakthrough user experience and technology innovations that simplify access to information, improve organisational agility, streamline integration with a wide range of applications, enhance reporting, and maximize your investment in other Microsoft products and technologies.

Microsoft Dynamics NAV 2009 is a business management solution that works the way people do. Easy-to-use Role Centers give everyone in your organisation new ways to organise work and prioritise relevant tasks, increasing productivity and effectiveness.

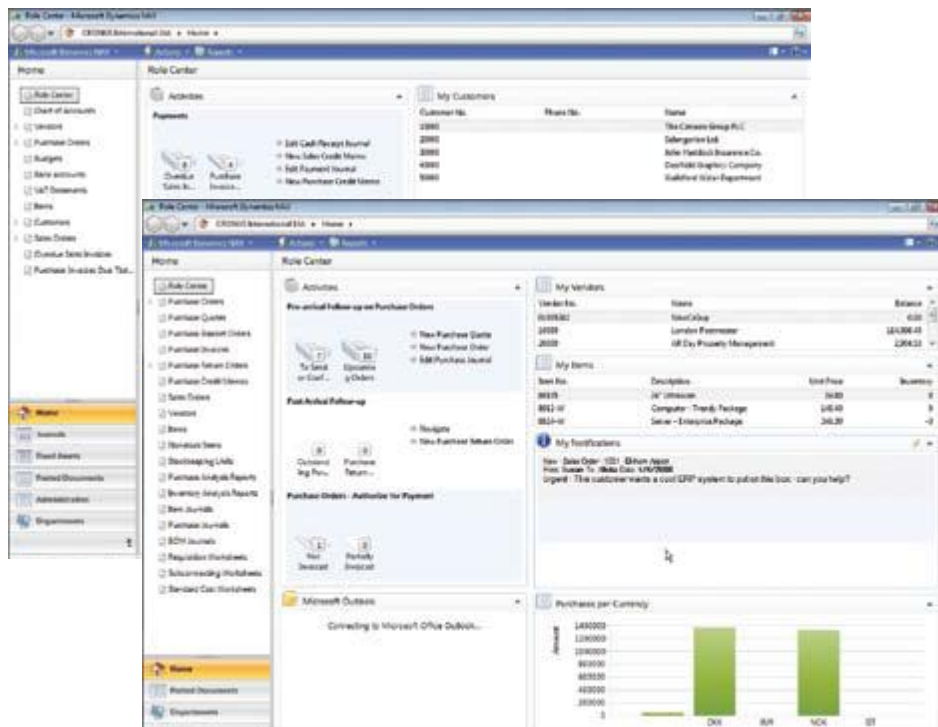

Microsoft Dynamics NAV 2009 introduces three-tier architecture and built-in support for Web services that can simplify connecting to other applications, significantly reducing integration efforts and costs. You'll also gain improved flexibility and power to exchange information and collaborate with citizens, suppliers, and partners across a wide range of data sources.

### Breakthrough Role Centers Boost Productivity

Based on research into the way people really work, Microsoft Dynamics NAV 2009 delivers simplified access to RoleTailored views and business processes – giving your employees an appealing, easy-to-navigate window into their work world.

Role Centers are designed to make it easy for people to view their most important work priorities and easily access the information and tools they need.

Out of the box, Microsoft Dynamics NAV 2009 delivers 21 Role Centers optimized for different key employee functions. Working with Information Outlook, your Microsoft Dynamics Certified Partner for Local Government, you can customise Role Centers or create new ones that meet specific business and industry needs.

*Role centers provide employees with a comprehensive overview of the information and tasks most relevant to their jobs.*
